Summary Section

Investment Objective. The primary investment objective of the Longboard Managed Futures Strategy Fund (the “Fund”) is to seek positive absolute returns.

Fees and Expenses of the Fund. This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on Class A shares if you invest, or agree to invest in the future, at least \$25,000 in the Fund. More information about these and other discounts is available from your financial professional and under “Shareholder Information – More About Class A Shares” beginning on page 16 of this Prospectus.

Shareholder Fees <i>(fees paid directly from your investment)</i>	Class A	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.75%	None
Maximum Deferred Sales Charge (Load) (as a % of the lesser of the original offering price or NAV at redemption)	1.00% ⁽¹⁾	None
Redemption Fee	None	None
Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management (Unitary) Fees ⁽²⁾	2.99%	2.99%
Distribution and Service (Rule 12b-1) Fees	0.25%	0.00%
Other Expenses ⁽³⁾	0.00%	0.00%
Total Annual Fund Operating Expenses	3.24%	2.99%

(1) A maximum contingent deferred sales charge (“CDSC”) of 1.00% may apply to certain redemptions of Class A shares made within the first 12 months of their purchase when an initial sales charge was not paid on the purchase.

(2) The Fund’s Adviser provides investment advisory service and pays most of the Fund’s operating expenses (with certain exceptions) in return for a “unitary fee” (exclusive of any interest expenses, distribution fees or expenses, brokerage expenses, taxes and extraordinary expenses not incurred in the ordinary course of the Fund’s business.; acquired fund fees, expenses related to investments in short positions, and dividends, if any, will be borne by the Fund and will not be included in the unitary management fee).

(3) The Fund will invest a portion of its assets in a wholly-owned Cayman subsidiary, as described below (the “Subsidiary”). “Other Expenses” include the expenses of the Subsidiary.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	One Year	Three Years	Five Years	Ten Years
Class A	\$883	\$1,516	\$2,170	\$3,911
Class I	\$302	\$924	\$1,572	\$3,308

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the Fund’s fiscal period ended May 31, 2015, the Fund’s portfolio turnover rate was 0% of the average value of the portfolio.

Principal Investment Strategies. The Fund seeks to achieve its investment objectives using two principal strategies, a Futures Strategy and a Fixed Income Strategy:

Futures Strategy. The Fund pursues its investment objective by employing a trend following strategy (identifying opportunities as prices trend up and down) similar in general concept to the managed futures industry at large. The strategy is systematic

and rules based. The Adviser will consider a variety of exchange traded futures contracts and forward contracts. The Fund's holdings (either direct or held through a wholly-owned and controlled subsidiary (the "Subsidiary") will generally be diversified across the equities, energies, interest rates, grains, meats, soft commodities (such as sugar, coffee, and cocoa), currencies, and metals sectors; and will also be diversified across North America, Asia, Europe, Australia, and potentially Africa and South America. Through its investment in futures contracts and forward contracts, the Adviser seeks to capture long term trends in the global financial markets. Futures and forward contracts are contractual agreements to buy or sell a particular currency, commodity or financial instrument at a pre-determined price in the future.

To pursue the Fund's Futures Strategy, the Fund intends to invest up to 25% of its total assets in the Subsidiary. Assets in the Fund's Subsidiary will be invested in commodity-related derivatives pursuant to the Futures Strategy. The Fund may also invest directly in certain financial-related derivatives with a portion of its assets pursuant to the Futures Strategy. Additionally, the Fund will, at times, purchase options on futures contracts, to cover the potential obligation regarding delivery of assets specified in the contracts. The Fund anticipates that it will generally invest between 5-30% of its assets (whether directly or through the Subsidiary) pursuant to the Futures Strategy.

The Subsidiary is a wholly-owned and controlled subsidiary of the Fund, organized under the laws of the Cayman Islands as an exempted company. Generally, the Subsidiary will invest primarily in commodity futures and swaps on commodity futures but it may also invest in financial futures, option and swap contracts, fixed income securities, pooled investment vehicles, including those that are not registered pursuant to the 1940 Act, and other investments intended to serve as margin or collateral for the Subsidiary's derivative positions.

Fixed Income Strategy. The Fixed Income strategy is designed to generate absolute returns from interest income with less volatility than equity markets by investing primarily in U.S. Dollar-denominated fixed income securities including: (1) obligations issued or guaranteed by the United States Government, its agencies or instrumentalities, (2) bonds, notes, or similar debt obligations issued by U.S. or foreign corporations, (3) U.S. asset-backed securities ("ABS") and (4) U.S. structured notes. The Fund restricts fixed income securities to those having a short-term rating of prime (highest short-term debt category) and/or a long-term rating of investment grade (BBB- or higher). The fixed income portion of the Fund's portfolio will be invested without restriction as to individual security maturity, but the average duration (a measure of interest rate risk similar to maturity) of the fixed income portfolio will not exceed 5 years. The Fund generally invests between 70-95% of its assets pursuant to the Fixed Income Strategy and/or in cash and cash equivalents, although it reserves the right to invest up to 100% of its assets pursuant to the Fixed Income Strategy and/or in cash and cash equivalents.

The Adviser acts as the adviser to both the Fund and the Subsidiary.

Principal Risks. Remember that in addition to possibly not achieving your investment goals, you could lose money by investing in the Fund. The principal risks of investing in the Fund are:

- *Commodities Risk:* Investing in the commodities markets (directly or indirectly) may subject the Fund to greater volatility than investments in traditional securities. Commodity prices may be influenced by unfavorable weather, animal and plant disease, geologic and environmental factors as well as changes in government regulation such as tariffs, embargoes or burdensome production rules and restrictions.
- *Forward and Futures Contract Risk:* The successful use of forward and futures contracts draws upon the Adviser's skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

- *Options Risk:* Options are subject to sudden price movements and are highly leveraged, in that payment of a relatively small purchase price, called a premium, gives the buyer the right to acquire an underlying futures contract, forward contract or commodity that has a face value substantially greater than the premium paid. The buyer of an option risks losing the entire purchase price of the option. The writer, or seller, of an option risks losing the difference between the purchase price received for the option and the price of the futures contract, forward contract or commodity underlying the option that the writer must purchase or deliver upon exercise of the option. There is no limit on the potential loss.
- *Credit Risk:* There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes.
- *Derivatives Risk:* The Fund may use derivatives (including commodity futures, options on futures and swap agreements) to enhance returns or hedge against market declines. The Fund's indirect use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities including leverage risk, counterparty default risk and tracking risk. The value of a commodity-linked derivative investment typically is based upon the price movements of a physical commodity (such as heating oil, livestock, or agricultural products), a commodity futures contract or commodity index, or some other readily measurable economic variable dependent upon changes in the value of commodities or the commodities markets. The value of these securities will rise or fall in response to changes in the underlying commodity or related benchmark or investment. These securities expose the Fund economically to movements in commodity prices.
- *Fixed Income Securities Risk:* Fixed income securities are subject to the risk that securities could lose value because of interest rate changes. Generally, as interest rates increase, prices decrease. Fixed income securities with longer maturities are subject to greater price shifts as a result of interest rate changes than fixed income securities with shorter maturities. Fixed income securities are also subject to prepayment and credit risks.
- *Cash or Cash Equivalents Risk:* At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.
- *Structured Notes Risk:* Structured notes involve leverage risk, tracking risk and issuer default risk.
- *Asset-Backed Securities ("ABS") Risk:* ABS are subject to credit risk because underlying loan borrowers or obligors may default. Additionally, these securities are subject to prepayment risk because the underlying loans or assets held by the issuers may be paid off prior to maturity. The value of these securities may go down as a result of changes in prepayment rates on the underlying loans or assets. During periods of declining interest rates, prepayment rates usually increases and the Fund may have to reinvest prepayment proceeds at a lower interest rate.
- *Foreign Investment Risk.* Foreign investments involve certain risks not generally associated with investments in the securities of U.S. companies, including changes in currency exchange rates, unstable political, social and economic conditions, a lack of adequate or accurate company information, differences in the way securities markets operate, less secure international banks or securities depositories than those in the U.S. and foreign controls on investment. In addition, individual international country economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, capital reinvestment, resources, self-sufficiency and balance of payments position. These risks may be greater in emerging markets and in less developed countries.
- *Foreign Exchanges Risk:* A portion of the derivatives trades made by the Fund may take place on foreign markets. Neither existing CFTC regulations nor regulations of any other U.S. governmental agency apply to transactions on foreign markets. Some of these foreign markets, in contrast to U.S. exchanges, are so-called principals' markets in which performance is the responsibility only of the individual counterparty with whom the trader has entered into a

commodity interest transaction and not of the exchange or clearing corporation. In these kinds of markets, there is risk of bankruptcy or other failure or refusal to perform by the counterparty.

- *Issuer-Specific Risk:* The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.
- *Leverage Risk:* Using derivatives like commodity futures and options to increase the Fund's combined long and short exposure creates leverage, which can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price.
- *Limited History of Operations Risk:* The Fund has a limited history of operations. In addition the Adviser has limited experience managing a mutual fund.
- *Liquidity Risk:* Liquidity risk exists when particular investments of the Fund would be difficult to purchase *or sell*, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations.
- *Management Risk:* The risk that investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies.
- *Market Risk:* Overall securities and derivatives market risks may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities and derivatives markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.
- *Non-Diversified Portfolio Risk.* The Fund is "non-diversified," and thus may invest its assets in a smaller number of companies or instruments than many other funds. As a result, an investment in the Fund has the risk that changes in the value of a single security may have a significant effect on the Fund's value.
- *Short Position Risk:* The Fund will incur a loss as a result of a short position if the price of the short position instrument increases in value between the date of the short position sale and the date on which an offsetting position is purchased. Short positions may be considered speculative transactions and involve special risks, including greater reliance on the Adviser's ability to anticipate accurately the future value of a security or instrument. The Fund's losses are potentially unlimited in a short position transaction.
- *Strategy Risk:* The risk that investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- *Tax Risk:* Certain of the Fund's investment strategies, including transactions in options, futures contracts, forward contracts, swap contracts and hedging transactions, may be subject to the special tax rules, the effect of which may have adverse tax consequences for the Fund. Also, while investing in commodities indirectly through the Subsidiary, will permit the Fund to obtain exposure to the commodities markets, because the Subsidiary is a controlled foreign corporation, any income received from its investments will be passed through to the Fund as ordinary income, which may be taxed at less favorable rates than capital gains. Additionally, the Internal Revenue Service ("IRS") has issued a number of private letter rulings to other mutual funds (unrelated to the Fund), which indicate that certain income from a fund's investment in a wholly-owned foreign subsidiary will constitute "qualifying income" for purposes of Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). However, the IRS has suspended issuance of any further letters pending a review of its position. If the IRS were to change its position with respect to the conclusions reached in these private letter rulings (which change in position might be applied to the Fund

retroactively), the income from the Fund's investment in the Subsidiary might not be qualifying income, and the Fund might not qualify as a regulated investment company for one or more years.

- *Regulatory Change Risk:* The Adviser has, on behalf of the Fund, filed a notice with the National Futures Association claiming an exemption from certain of the CFTC's reporting and disclosure requirements in accordance with Part 4 of the CFTC regulations. If, in the future, the Adviser determines that it is not eligible for this exemption or other relief from CFTC regulation, the Fund will be required to comply with CFTC regulations regarding disclosure and reporting. Compliance with such requirements will likely increase the costs associated with an investment in the Fund.
- *Wholly-Owned Subsidiary Risk:* The Subsidiary will not be registered under the 1940 Act and, unless otherwise noted in this Prospectus, will not be subject to all of the investor protections of the 1940 Act. The Adviser has, on behalf of the Subsidiary, filed a notice with the National Futures Association claiming exemption from the CFTC's reporting requirements in accordance with Part 4 of the CFTC Regulations pursuant to no-action relief for certain subsidiaries of registered investment companies. Under this no-action letter guidance, the CFTC provides relief relating to CFTC disclosure requirements for commodity pools, such as the Subsidiary, that are wholly-owned subsidiaries of registered investment companies (such as the Fund). The Adviser also claims exemption from the CFTC's disclosure requirements in accordance with Part 4 of the CFTC Regulations, which provide relief relating to CFTC disclosure and reporting requirements for commodity pools, such as the Subsidiary, that are operated by a CPO that is the same as, controls, is controlled by or is under common control with the CPO of an offered pool (such as the Fund). Changes in the laws or regulations of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary, respectively, are organized, could result in the inability of the Fund and/or Subsidiary to operate as described in this Prospectus and could negatively affect the Fund and its shareholders. Your cost of investing in the Fund will be higher because you indirectly bear the expenses of the Subsidiary.

Although only 25% of the Fund's assets may be invested in the Subsidiary, that portion of the Fund's assets may be highly leveraged, which can magnify the Fund's potential for gain or loss and, therefore, amplify the effects of market volatility on the Fund's share price.

- *Volatility Risk:* The Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause the Fund's net asset value per share to experience significant appreciations or decreases in value over short periods of time.
- *High Portfolio Turnover Risk:* In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate, resulting in an expected portfolio turnover rate of 0% for the Fund. However, if these instruments were included in the calculation, the Fund's strategy would result in frequent portfolio trading and a high portfolio turnover rate (typically greater than 300%). By investing on a shorter-term basis, the Subsidiary may trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liabilities to shareholders in the Fund.
- *Interest Rate Risk:* Certain tax requirements dictate that only 25% of the Fund's assets can be invested in the Subsidiary in order to gain exposure to commodities. As a result, a significant portion of the Fund's assets will be invested in short-term interest rate instruments or securities to increase returns. If interest rates increase, the Fund may earn interest at rates below prevailing market rates.
- *Cyber Security Risk.* As the use of technology has become more prevalent in the course of business, the Fund has become more susceptible to operational, financial and information security risks resulting from cyber-attacks and/or technological malfunctions. Successful cyber-attacks and/or technological malfunctions affecting the Fund or its service providers can result in, among other things, financial losses to the Fund and its shareholders, the inability to process transactions with shareholders or other parties and the release of private shareholder information or confidential Fund information. While measures have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in such measures and there is no guarantee those

measures will be effective, particularly since the Fund does not directly control the cyber security measures of its service providers, financial intermediaries and companies in which it invests or with which it does business.

Performance. The bar chart and Average Annual Total Returns table give some indication of the risks of investing in the Fund. The bar chart shows the performance of Class I shares of the Fund for each full calendar year since the Fund's inception. The Average Annual Total Returns table shows how the Fund's average annual returns compare with those of a broad measure of market performance. Remember, the Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information will be available at no cost by calling the Fund toll-free at 855-294-7540.

The calendar year-to-date return for the Fund's Class I shares as of June 30, 2015 was 8.44%. During the period shown in the bar chart, the best performance for a quarter was 10.32% (for the quarter ended December 31, 2013). The worst performance was -7.75% (for the quarter ended June 30, 2013).

Average Annual Total Returns for the periods ended December 31, 2014

	One Year	Life of Fund
Class I Shares		
Return Before Taxes	14.84%	6.52%*
Return After Taxes on Distributions	14.36%	6.28%
Return After Taxes on Distributions and Sale of Fund Shares	8.60%	4.97%
Class A shares		
Return Before Taxes	7.97%	3.64%
Bank of America Merrill Lynch 3 Month U.S. Treasury Bill Index (reflects no deduction for fees, expenses or taxes)		
	0.03%	0.07%

* Class I shares of the Longboard Managed Futures Strategy Fund commenced operations on June 27, 2012.

**Class A shares of the Longboard Managed Futures Strategy Fund commenced operations on March 22, 2013.

After-tax returns are based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and may differ from those shown. If you own shares of the Fund in a tax-deferred account, such as an individual retirement account or a 401(k) plan, this information is not applicable to your investment. A higher after-tax return results when a capital loss occurs upon redemption and translates into an assumed tax deduction that benefits the shareholder.

The Bank of America Merrill Lynch 3-month U.S. Treasury Bill Index is an index of short-term U.S. Government securities with a remaining maturity of less than three months.

¹ The return shown in the bar chart is for Class I shares. The performance of Class A shares will differ due to differences in expenses.

Investment Adviser. Longboard Asset Management, LLC serves as the Fund's investment adviser (the "Adviser").

Investment Adviser Portfolio Managers. The following serve as the Fund's portfolio managers:

Portfolio Manager	Primary Title	Manager Since
Eric Crittenden	Chief Investment Officer	June 2012
Cole Wilcox	Chief Executive Officer	June 2012

Purchase and Sale of Fund Shares. You may conduct transactions by mail (Longboard Managed Futures Strategy Fund, c/o Gemini Fund Services, LLC, 17605 Wright Street, Omaha NE 68130), or by telephone at 855-294-7540. Investors who wish to purchase or redeem Fund shares through a financial intermediary should contact the financial intermediary directly. The minimum initial investment is \$2,500, and \$10,000, for Class A and Class I shares respectively, with a minimum subsequent investment of \$250, and \$2,500 for Class A and Class I shares, respectively, although the Fund reserves the right to waive minimum initial investment or minimum subsequent investment requirements in its sole discretion.

Tax Information. The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Distributions on investments made through tax-deferred arrangements, such as 401(k) plans and individual retirement accounts, may be taxed later upon withdrawal of assets from such plans or accounts.

Payments to Broker-Dealers and Other Financial Intermediaries. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Investment Strategies, Related Risks and Disclosure of Portfolio Holdings

Investment Objective

Investment Objective. The primary investment objective of the Fund is to seek positive absolute returns. The Fund's investment objective is not fundamental and may be changed without the approval of shareholders. Shareholders will be given 60 days' notice of any such change.

Principal Investment Strategies

The Fund seeks to achieve its investment objectives using two principal strategies, a Futures Strategy and a Fixed Income Strategy.

Futures Strategy. The Fund pursues its investment objective by employing a trend following strategy (identifying opportunities as prices trend up and down) similar in general concept to the managed futures industry at large. The strategy is systematic and rules based. The Adviser will consider a variety of exchange traded futures contracts and forward contracts. The Fund's holdings (either direct or held through a wholly-owned and controlled Subsidiary (the "Subsidiary") will generally be diversified across the equities, energies, interest rates, grains, meats, soft commodities (such as sugar, coffee, and cocoa), currencies, and metals sectors; and will also be diversified across North America, Asia, Europe, Australia, and potentially Africa and South America.

To pursue the Fund's Futures Strategy, the Fund invests up to 25% of its total assets in the Subsidiary. Assets in the Subsidiary will be invested in commodity-related derivatives pursuant to the Futures Strategy. The Fund may also invest directly in certain financial-related derivatives with a portion of its assets pursuant to the Futures Strategy. Additionally, the Fund will, at times, purchase options on futures contracts, to cover the potential obligation regarding delivery of assets specified in the contracts. The Fund anticipates that it will generally invest between 5-30% of its assets (whether directly or through the Subsidiary) pursuant to the Futures Strategy.

Through its investment in futures contracts and forward contracts, the Adviser seeks to capture long term trends in the global financial markets. Futures and forward contracts are contractual agreements to buy or sell a particular currency, commodity or financial instrument at a pre-determined price in the future. The Fund's use of futures contracts, forward contracts, swaps and certain other financial instruments (whether direct or through the Subsidiary will have the economic effect of financial leverage. Financial leverage magnifies exposure to the swings in prices of a commodity or financial instrument underlying such a contract and results in increased volatility, which means the Fund will have the potential for greater gains, as well as the potential for greater losses, than if the Fund does not use such instruments that have a leveraging effect. Leveraging tends to magnify, sometimes significantly, the effect of any increase or decrease in the Fund's exposure to a commodity and may cause the Fund's net asset value to be volatile. For example, if the Adviser seeks to gain enhanced exposure to a specific commodity through an instrument providing leveraged exposure to the commodity and that instrument increases in value, the gain to the Fund will be magnified; however, if that investment decreases in value, the loss to the Fund will be magnified. A decline in the Fund's assets due to losses magnified by the instruments providing leveraged exposure may require the Fund to liquidate portfolio positions to satisfy its obligations, to meet redemption requests or to meet asset segregation requirements when it may not be advantageous to do so. There is no assurance that the Fund's use of instruments providing enhanced exposure will enable the Fund to achieve its investment objective.

As a result of the Fund's strategy, the Fund may have highly leveraged exposure to one or more commodities or asset classes at times. The 1940 Act and the rules and interpretations thereunder impose certain limitations on the Fund's ability to use leverage; however, the Fund is not subject to any additional limitations on its net long and short exposures. The Fund could hold instruments that seek to provide a multiple (e.g., five times) the net return or loss of a broad or narrow-based securities index over a particular period of time. Performance of such instruments over longer periods of time, however, can differ significantly from the performance (or inverse of the performance) of the underlying index during the same period of time. The use of leverage may also increase the risks associated with an investment in the Fund.

The Fund is actively managed and the Adviser will vary the Fund's exposures to various instruments based on the Adviser's application of its systematic trading strategy.

The Subsidiary is a wholly-owned and controlled subsidiary of the Fund, organized under the laws of the Cayman Islands as an exempted company. Generally, the Subsidiary will invest primarily in commodity futures and swaps on commodity futures but it may also invest in financial futures, option and swap contracts, fixed income securities, pooled investment vehicles, including those that are not registered pursuant to the 1940 Act, and other investments intended to serve as margin or collateral for the Subsidiary's derivative positions. The Fund will invest in the Subsidiary in order to gain exposure to the commodities markets within the limitations of the federal tax laws, rules and regulations that apply to registered investment companies. Unlike the Fund, the Subsidiary may invest without limitation in commodity-linked derivatives, however, the Subsidiary will comply with the same 1940 Act asset coverage requirements with respect to its investments in commodity-linked derivatives that are applicable to the Fund's transactions in derivatives. In addition, to the extent applicable to the investment activities of the Subsidiary, the Subsidiary will be subject to the same fundamental investment restrictions and will follow the same compliance policies and procedures as the Fund. The Fund is the sole shareholder of the Subsidiary and does not expect shares of the Subsidiary to be offered or sold to other investors.

Fixed Income Strategy. The Fund generally invests between 70-95% of its assets pursuant to the Fixed Income Strategy and/or in cash and cash equivalents, although it reserves the right to invest up to 100% of its assets pursuant to the Fixed Income Strategy and/or in cash and cash equivalents. The Fixed Income strategy is designed to generate absolute returns from interest income with less volatility than equity markets by investing primarily in U.S. Dollar-denominated fixed income securities including: (1) obligations issued or guaranteed by the United States Government, its agencies or instrumentalities, (2) bonds, notes, or similar debt obligations issued by U.S. or foreign corporations, (3) U.S. asset-backed securities ("ABS") and (4) U.S. structured notes. Structured notes are debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities include structured notes as well as securities other than debt securities, the interest rate or principal of which is determined by an unrelated indicator. Indexed securities may include a multiplier that multiplies the indexed element by a specified factor and, therefore, the value of such securities may be very volatile.

The Fund restricts fixed income securities to those having a short-term rating of prime (highest short-term debt category) by at least two of the three following NRSROs (Nationally Recognized Statistical Rating Organizations, Moody's Investors Service,

Standard and Poor's or Fitch) and/or a long-term rating of investment grade (BBB- or higher) by two NRSROs and cannot be rated lower than prime/investment grade by any NRSRO, or if unrated, determined to be of similar quality. The fixed income portion of the Fund's portfolio will be invested without restriction as to individual security maturity, but the average duration (a measure of interest rate risk similar to maturity) of the fixed income portfolio will not exceed 5 years.

Principal Risks of Investing in the Fund

Before investing in the Fund, you should carefully consider your own investment goals, the amount of time you are willing to leave your money invested and the amount of risk you are willing to take. **Remember that in addition to possibly not achieving your investment goals, you could lose money by investing in the Fund.** The value of your investment in the Fund will go up and down with the prices of the securities in which the Fund invests. The principal risks of investing in the Fund are:

Commodity Risk: The Fund's exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments, commodity-based exchange traded trusts and commodity-based exchange traded funds and notes may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. Commodity interest contracts are typically traded on margin. This means that a small amount of capital can be used to invest in contracts of much greater total value. The resulting leverage means that a relatively small change in the market price of a contract can produce a substantial loss. Like other leveraged investments, any purchase or sale of a contract may result in losses in excess of the amount invested in that contract. The Subsidiary may lose more than its initial margin deposits on a trade.

Forward and Futures Contract Risk: The successful use of forward and futures contracts draws upon the Adviser's skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Adviser's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Options Risk: Options involve risks similar to futures, because options are subject to sudden price movements and are highly leveraged, in that payment of a relatively small purchase price, called a premium, gives the buyer the right to acquire an underlying futures contract, forward contract or commodity that has a face value substantially greater than the premium paid. The buyer of an option risks losing the entire purchase price of the option. The writer, or seller, of an option risks losing the difference between the purchase price received for the option and the price of the futures contract, forward contract or commodity underlying the option that the writer must purchase or deliver upon exercise of the option. There is no limit on the potential loss. Specific market movements of the futures contracts, forward contracts or commodities underlying an option cannot accurately be predicted.

Credit Risk: There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes. Lower credit quality may lead to greater volatility in the price of a security and in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult for the Fund to sell the security. Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings. Credit risk also exists whenever the Fund enters into a foreign exchange or derivative contract, because the counterparty may not be able or may choose not to perform under the contract. When the Fund invests in foreign currency contracts, or other over-the-counter derivative instruments (including options), it is assuming a credit risk with regard to the party with which it trades and also bears the risk of settlement default.

These risks may differ materially from risks associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily mark-to-market and settlement, segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

Derivatives Risk: The Fund may use derivatives (including commodity futures, options on futures, swap agreements and structured notes) to gain exposure to commodities, enhance returns or hedge against market declines. The Fund's use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Derivative contracts ordinarily have leverage inherent in their terms. The low margin deposits normally required in trading derivatives, including futures contracts, permit a high degree of leverage. Accordingly, a relatively small price movement may result in an immediate and substantial loss to the Fund. Because option premiums paid or received by the Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities. The value of a commodity-linked derivative investment typically is based upon the price movements of a physical commodity (such as heating oil, livestock, or agricultural products), a commodity futures contract or commodity index, or some other readily measurable economic variable dependent upon changes in the value of commodities or the commodities markets. The value of these securities will rise or fall in response to changes in the underlying commodity or related benchmark or investment. These securities expose the Fund economically to movements in commodity prices.

Fixed Income Risk: When the Fund invests in fixed income securities or derivatives, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

Cash or Cash Equivalents Risk: At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Structured Notes Risk: Structured notes involve risks different from, or possibly greater than, the risks associated with traditional investments. These risks include (i) the risk that the issuer may default; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the note may not correlate perfectly with the underlying assets, rate or index. Structured note prices may be highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading structured notes involves risks different from, or possibly greater than, the risks associated with investing traditional securities including:

Leverage and Volatility Risk: Structured notes ordinarily have leverage inherent in their terms. Accordingly, a relatively small movement in an index to which structured note is linked may result in an immediate and substantial loss.

Liquidity Risk: Although it is anticipated that the structured notes will be actively traded, it is possible that particular investments might be difficult to purchase or sell, possibly preventing the Fund from executing positions at an advantageous time or price, or possibly requiring them to dispose of other investments at unfavorable times or prices in order to satisfy their obligations.

Tracking Risk: Structured notes may not be perfect substitutes for the securities, commodities or currencies they are intended to track. Factors such as differences in supply and demand for certain structured note-related derivatives and indices may cause structured note returns to deviate from the adviser's expectations. Consequently, structured note returns may not be highly correlated to the securities commodities or currencies they are intended to track.

ABS Risk: ABS are subject to credit risk because underlying loan borrowers or obligors may default. Because ABS are typically backed by consumer loans, their default rates tend to be sensitive to the unemployment rate and overall economic conditions. Certain individual securities may be more sensitive to default rates because payments may be subordinated to other securities of the same issuer. Additionally, ABS are subject to prepayment risk because the underlying loans held by the issuers may be paid off prior to maturity. The value of these securities may go down as a result of changes in prepayment rates on the underlying mortgages or loans. During periods of declining interest rates, prepayment rates usually increases and the Fund may have to reinvest prepayment proceeds at a lower interest rate.

Foreign Investment Risk: To the extent that the Fund makes foreign investments, your investment is subject to certain risks that may not apply to U.S. investments. These include risks relating to political, social and economic developments abroad and differences between U.S. and foreign regulatory requirements and market practices. Securities that are denominated in foreign currencies are subject to the further risk that the value of the foreign currency will fall in relation to the U.S. dollar and/or will be affected by volatile currency markets or actions of U.S. and foreign governments or central banks. In addition to developed markets, the Fund's foreign investments may include investments in securities of companies in emerging markets, which are markets of countries in the initial stages of industrialization and that generally have low per capita income. In addition to the risks of foreign investments in general, countries in emerging markets are generally more volatile and can have relatively unstable governments, social and legal systems that do not protect shareholders, economies based on only a few industries and securities markets that trade a small number of issues.

Foreign Exchanges Risk: A portion of the derivatives trades made by the Fund may take place on foreign markets. Neither existing CFTC regulations nor regulations of any other U.S. governmental agency apply to transactions on foreign markets. Some of these foreign markets, in contrast to U.S. exchanges, are so-called principals' markets in which performance is the responsibility only of the individual counterparty with whom the trader has entered into a commodity interest transaction and not of the exchange or clearing corporation. In these kinds of markets, there is risk of bankruptcy or other failure or refusal to perform by the counterparty.

Issuer-Specific Risk: The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments. The value of the Fund's investment will be dependent on the success of the managed futures strategies used by the Adviser.

Leverage Risk: Using derivatives like commodity futures and options to increase the Fund's combined long and short position exposure creates leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of mutual funds that do not use such techniques.

Limited History of Operations Risk: The Fund has a limited history of operation. In addition, the Adviser has limited experience managing a mutual fund. Mutual funds and their advisers are subject to restrictions and limitations imposed by the 1940 Act and the Internal Revenue Code that do not apply to an adviser's management of individual and institutional accounts. As a

result, investors cannot judge the Adviser by a mutual fund-specific track record and it may not achieve its intended result in managing the Fund.

Liquidity Risk: The Fund is subject to liquidity risk. Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations. Funds with principal investment strategies that involve securities of companies with smaller market capitalizations, non-U.S. securities, Rule 144A securities, derivatives or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk.

Management Risk: The net asset value of the Fund changes daily based on the performance of the securities and derivatives (including commodity futures and options) in which it invests. The Adviser's judgments about the attractiveness, value and potential appreciation of particular securities and derivatives in which the Fund invests may prove to be incorrect and may not produce the desired results. The Fund's profitability will also depend upon the ability of the Adviser to allocate successfully the assets of the Fund's wholly owned Subsidiary among securities that employ managed futures strategies profitably and the Adviser's judgments about the attractiveness, value and potential appreciation the fixed income securities in which the Fund will invest. There can be no assurance that any of the securities or derivatives selected by the Adviser will produce positive returns.

Market Risk: The net asset value of the Fund will fluctuate based on changes in the value of the securities and derivatives in which the Fund invests directly and indirectly through its wholly-owned Subsidiary. The Fund invests in securities and derivatives, which may be more volatile and carry more risk than some other forms of investment. The price of securities and derivatives may rise or fall because of economic or political changes. Security and derivative prices in general may decline over short or even extended periods of time. Market prices of securities and derivatives in broad market segments may be adversely affected by price trends in commodities, interest rates, exchange rates or other factors wholly unrelated to the value or condition of an issuer.

Non-Diversified Portfolio Risk: The Fund is "non-diversified," meaning that may invest its assets in a smaller number of companies or instruments than many other funds. As a result, your investment in the Fund has the risk that changes in the value of a single investment may have a significant effect on the Fund's net asset value ("NAV"). Lack of broad diversification also may cause the Fund to be more susceptible to specific economic, political or regulatory events than a diversified fund. Although the Fund intends to satisfy the diversification requirements of a regulated investment company under section 851 of the Internal Revenue Code, those requirements are not as stringent as those required of a diversified fund under the 1940 Act.

Short Position Risk: The Fund's long positions could decline in value at the same time that the value of the short positions increase, thereby increasing the Fund's overall potential for loss. The Fund's short positions may result in a loss if the price of the short position instruments rise and it costs more to replace the short positions. In contrast to the Fund's long positions, for which the risk of loss is typically limited to the amount invested, the potential loss on the Fund's short positions is unlimited; however, the Fund will be in compliance with Section 18(f) of the 1940 Act, to ensure that a Fund shareholder will not lose more than the amount invested in the Fund. Market factors may prevent the Fund from closing out a short position at the most desirable time or at a favorable price.

Strategy Risk: The risk that investment strategies employed by the Adviser in selecting investments and asset allocations for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments. There is no assurance that the Adviser's investment strategies will be successful and will enable the Fund to achieve its investment objective.

Tax Risk: The Fund's short sales and transactions in options, futures contracts, hedging transactions, forward contracts and swap contracts will be subject to special tax rules (including mark-to-market, constructive sale, wash sale and short sale rules) the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains or convert short-term capital losses into long-term capital losses. These rules could, therefore, affect the amount, timing and character of distributions to the Fund's shareholders. The Fund's use of such transactions may result in the Fund realizing more short-term capital

gains (subject to tax at ordinary income tax rates) and ordinary income subject to tax at ordinary income tax rates than it would if it did not engage in such transactions. Additionally, by investing in commodities indirectly through the Subsidiary, the Fund will obtain exposure to the commodities markets within the federal tax requirements that apply to the Fund. Specifically, the Subsidiary is expected to provide the Fund with exposure to the commodities markets within the current limitations of the federal tax requirements of Subchapter M of the Code. Sub-chapter M requires, among other things, that at least 90% of the Fund's income be derived from securities or derived with respect to its business of investing in securities (typically referred to as "qualifying income"). The Fund will make investments in certain commodity-linked derivatives through the Subsidiary because income from these derivatives is not treated as "qualifying income" for purposes of the 90% income requirement if the Fund invests in the derivative directly. The Internal Revenue Service ("IRS") has issued a number of private letter rulings to other mutual funds (unrelated to the Fund), which indicate that certain income from a fund's investment in a wholly-owned foreign subsidiary will constitute "qualifying income" for purposes of Subchapter M. The IRS, however, has suspended issuance of any further private letter rulings of this type pending a review of its position and the release of public guidance on the issue that can be relied upon by all taxpayers (as opposed to the "private" guidance previously issued to individual taxpayers in the aforementioned private letter rulings). Because a private letter ruling applies only to the taxpayer to whom it is issued, the Fund is not entitled to rely upon the private letter rulings issued to other mutual funds. However, the Fund believes that the prior private letter rulings evidence both a correct interpretation of the existing law and the current view of the IRS, consistently applied to a number of similarly situated mutual funds. Accordingly, the Fund intends to treat the income derived from its investment in the Subsidiary as "qualifying income" for purposes of Subchapter M. As a result, if the IRS were to change its position with respect to the conclusions reached in its private letter rulings (which change in position might be applied to the Fund retroactively), the income from the Fund's investment in the Subsidiary might not be qualifying income, and the Fund might not qualify as a regulated investment company for one or more years. In such event, the Fund's Board of Trustees would consider what action to take in the best interests of shareholders.

Regulatory Change Risk: The Adviser has, on behalf of the Fund, filed a notice with the National Futures Association claiming an exemption from certain of the CFTC's reporting and disclosure requirements in accordance with Part 4 of the CFTC Regulations. If, in the future, the Adviser determines that it is not eligible for this exemption or other relief from CFTC regulation, the Fund will be required to comply with CFTC regulations regarding disclosure and reporting. Compliance with such requirements will likely increase the costs associated with an investment in the Fund.

Wholly-Owned Subsidiary Risk: The Subsidiary will not be registered under the 1940 Act and, unless otherwise noted in this Prospectus, will not be subject to all of the investor protections of the 1940 Act. The Adviser has, on behalf of the Subsidiary, filed a notice with the National Futures Association claiming exemption from the CFTC's reporting requirements in accordance with Part 4 of the CFTC Regulations pursuant to no-action relief for certain subsidiaries of registered investment companies. Under this no-action letter guidance, the CFTC provides relief relating to CFTC disclosure requirements for commodity pools, such as the Subsidiary, that are wholly-owned subsidiaries of registered investment companies (such as the Fund). The Adviser also claims exemption from the CFTC's disclosure requirements in accordance with Part 4 of the CFTC Regulations, which provide relief relating to CFTC disclosure and reporting requirements for commodity pools, such as the Subsidiary, that are operated by a CPO that is the same as, controls, is controlled by or is under common control with the CPO of an offered pool (such as the Fund). Changes in the laws or regulations of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary, respectively, are organized, could result in the inability of the Fund and/or the Subsidiary to operate as described in this Prospectus and could negatively affect the Fund and its shareholders. Your cost of investing in the Fund will be higher because you indirectly bear the expenses of the Subsidiary.

The Fund, by investing in the Subsidiary, will not have all of the protections offered to investors in registered investment companies. However, the Fund wholly owns and controls the Subsidiary. The investments of the Fund and Subsidiary are both managed by the Adviser, making it unlikely that the Subsidiary will take action contrary to the interests of the Fund or its shareholders. The Board of Trustees has oversight responsibility for the investment activities of the Fund, including its investment in the Subsidiary, and the Fund's role as the sole shareholder of the Subsidiary. Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and Subsidiary, respectively, are organized, could result in the inability of the Fund and/or Subsidiary to operate as described in this Prospectus and could negatively affect the Fund and its shareholders. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

Volatility Risk: The Fund may have investments that appreciate or decrease significantly in value over short periods of time. This may cause the Fund's net asset value per share to experience significant appreciations or decreases in value over short periods of time.

High Portfolio Turnover Risk: In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate, resulting in an expected portfolio turnover rate of 0% for the Fund. However, if these instruments were included in the calculation, the Fund's strategy would result in frequent portfolio trading and a high portfolio turnover rate (typically greater than 300%). By investing on a shorter-term basis, the Subsidiary may trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liabilities to shareholders in the Fund.

Interest Rate Risk: The 1940 Act dictates that only 25% of the Fund's assets can be invested in the Subsidiary in order to gain exposure to commodities. As a result, a significant portion of the Fund's assets will be invested in short-term interest rate instruments or securities to increase returns. If interest rates increase, the Fund may earn interest at rates below prevailing market rates.

Cyber Security Risk. As the use of technology has become more prevalent in the course of business, the Fund has become more susceptible to operational, financial and information security risks resulting from cyber-attacks and/or technological malfunctions. Cyber-attacks have occurred and will continue to occur. Cyber-attacks include, among other things, the attempted theft, loss, misuse, improper release, corruption or destruction of, or unauthorized access to, confidential or highly restricted data relating to the Fund and its shareholders; and attempted compromises or failures to systems, networks, devices and applications relating to the operations of the Fund and its service providers. Cyber security breaches may result from unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) or from outside attacks, such as denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users).

Portfolio Holdings Information

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's SAI. The Fund may, from time to time, make available month-end portfolio holdings information on the website www.longboardmutualfunds.com, which may include information about the Fund's investments in securities of Underlying Pools, swaps, structured notes or other investments, and the investment managers accessed through such investments. If month-end portfolio holdings information is posted to the website, the information is expected to be posted approximately 10 business days or sooner after the month-end and remain available until new information for the next month is posted. Shareholders may request portfolio holdings schedules at no charge by calling 855-294-7540.

Management of the Fund

The Adviser

The Fund has entered into an Investment Advisory Agreement ("Advisory Agreement") with Longboard Asset Management, LLC, located at 2355 East Camelback Road, Suite 750, Phoenix, Arizona 85016, under which the Adviser manages the Fund's investments subject to the supervision of the Board of Trustees.

Pursuant to the Advisory Agreement, the Fund pays the Adviser a unitary management fee for the services and facilities it provides at the annual rate of 2.99% of the Fund's average daily net assets up to \$250 million and 2.75% on assets greater than \$250 million. The unitary management fee is paid on a monthly basis. The Board of Trustees, shareholders of the Fund or the Adviser may terminate the Advisory Agreement upon sixty (60) days notice.

The Adviser's unitary management fee is designed to pay substantially all the Fund's expenses and to compensate the Adviser for providing services for the Fund. Out of the unitary management fee, the Adviser pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other services, except for interest expenses, distribution fees or expenses, brokerage expenses, taxes and extraordinary expenses not incurred in the ordinary course of the Fund's business. Acquired fund fees, expenses related to investments in short positions, and dividends, if any,

will be borne by the Fund and will not be included in the unitary management fee. For the most recent fiscal year ended May 31, 2015, the Adviser received an advisory fee equal to 2.99% of the Fund's average daily net assets.

A discussion regarding the basis for the Board of Trustees' approval of the renewal of the Advisory Agreement is available in the Fund's annual report to shareholders dated May 31, 2015.

Adviser Portfolio Managers

Eric Crittenden

Portfolio Manager
Chief Investment Officer

Eric Crittenden is the Chief Investment Officer and Co-Founder of Longboard Asset Management. Mr. Crittenden has specialized in disciplined, rule based investment strategies for nearly two decades. Under his leadership Longboard's investment team recently achieved a 5-star rating from Morningstar – recognizing the firm as a top performer in the Managed Futures category out of 91 funds for the 3-year period ending 6.30.15, based on risk-adjusted returns.

Mr. Crittenden drives Longboard's discipline and focus on offering high quality alternative mutual funds that deliver sustainable long-term results. He is committed to our signature client service experience and regularly engages with our financial advisor partners to help them understand alternative investments and how to incorporate them into their practices.

His seminal research on trend following investment strategies has been cited by numerous publications, including *The Journal of Finance*. Mr. Crittenden holds a Series 3 Commodity Futures License and graduated Magna Cum Laude from Wichita State University with a degree in Finance.

Cole Wilcox

Portfolio Manager
Chief Executive Officer

Cole Wilcox is the Chief Executive Officer of Longboard Asset Management. Under his leadership, Longboard provides high-quality, alternative mutual funds to sophisticated financial advisors. Co-Founded by Mr. Wilcox in 2010, the firm manages approximately \$450 million in assets (as of 9.8.15).

Mr. Wilcox focuses on the management of Longboard. In this role, he ensures that our team delivers innovative solutions and highly personalized service to our clients. His passion for innovation also is reflected in his interest in emerging technologies and groundbreaking companies with disruptive business models.

The co-author of several leading research papers on alternative investment strategies, Mr. Wilcox has been featured in *The Wall Street Journal*, *CNBC* and *Bloomberg*. He was also profiled in *The Little Book of Trading*.

Mr. Wilcox holds a Series 3 Commodity Futures License and a Series 65 Uniform Investment Adviser Law Examination License. He is a graduate of the Owner/President Management Program at Harvard Business School.

Investment Subsidiary

The Fund may invest up to 25% of its total assets in the Subsidiary. The Subsidiary will invest the majority of its assets in futures and options on futures. The Subsidiary is organized under the laws of the Cayman Islands, and is overseen by its own board of directors. The Fund is the sole shareholder of the Subsidiary. It is not currently expected that shares of the Subsidiary will be sold or offered to other investors.

As with the Fund, the Adviser is responsible for the Subsidiary's day-to-day business pursuant to an investment advisory agreement with the Subsidiary. Under this agreement, the Adviser provides the Subsidiary with the same type of management

services, under the same terms, as are provided to the Fund. The Subsidiary has also entered into separate contracts for the provision of custody, transfer agency, and audit services with the same service providers that provide those services to the Fund.

The Subsidiary will be managed pursuant to compliance policies and procedures that are the same, in all material respects, as the policies and procedures adopted by the Fund. As a result, the Adviser is subject to the same investment policies and restrictions that apply to the management of the Fund, and, in particular, to the requirements relating to portfolio leverage, liquidity, brokerage, and the timing and method of the valuation of the Subsidiary's portfolio investments. These policies and restrictions are described in detail in the Fund's SAI. The Fund's Chief Compliance Officer oversees implementation of the Subsidiary's policies and procedures and makes periodic reports to the Fund's Board regarding the Subsidiary's compliance with its policies and procedures.

The financial statements of the Subsidiary will be consolidated in the Fund's financial statements, which are included in the Fund's annual and semi-annual reports. The Fund's annual and semi-annual reports are distributed to shareholders, and copies of the reports are provided without charge upon request as indicated on the back cover of this Prospectus. Please refer to the SAI for additional information about the organization and management of the Subsidiary.

Shareholder Information

Choosing a Share Class

The Trust has adopted a multiple class plan that allows the Fund to offer one or more classes of shares. The Fund has registered four classes of shares – Class A shares, Class C shares, Class I shares and Class N shares. Currently, only Class A shares and Class I shares are being offered. The different classes of shares represent investments in the same portfolio of securities, but the classes are subject to different expenses and may have different share prices as outlined below:

- Class A shares are charged a front-end sales load. The Class A shares are also charged a 0.25% Rule 12b-1 distribution and shareholder servicing fee.
- Class I shares are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund.

Class I Shares

Class I shares may be purchased without the imposition of any sales charges. Class I shares may also be offered through certain financial intermediaries (including broker-dealers) and their agents in fee based and other programs. In these programs financial intermediaries have made arrangements with the Fund and are authorized to buy and sell shares of the Fund that charge their customers transaction or other distribution or service fees with respect to their customers' investments in the Fund. Class I shares are sold at NAV without an initial sales charge, and are not subject to 12b-1 distribution fees. The minimum initial investment in Class I shares of the Fund is \$10,000. The minimum subsequent investment in Class I shares of the Fund is \$2,500.

More About Class A Shares

Class A shares are offered at their public offering price, which is NAV plus the applicable sales charge and is subject to Rule 12b-1 distribution and shareholder service fees of up to 0.25% of the average daily net assets of Class A shares. The minimum initial investment in Class A shares of the Fund is \$2,500. The minimum subsequent investment in Class A shares of the Fund is \$250 for all other accounts. The sales charge varies, depending on how much you invest. There are no sales charges on reinvested distributions. The Fund reserves the right to waive sales charges at its discretion. The following sales charges apply to your purchases of Class A shares of the Fund:

Amount of Transaction	Sales Charge as % of Public Offering Price ⁽¹⁾	Sales Charge as % of Net Amount Invested	Dealer Reallowance as a Percentage of Public Offering Price
Less than \$25,000	5.75%	6.10%	5.00%

Amount of Transaction	Sales Charge as % of Public Offering Price ⁽¹⁾	Sales Charge as % of Net Amount Invested	Dealer Reallocation as a Percentage of Public Offering Price
\$25,000 but less than \$50,000	4.75%	4.99%	4.25%
\$50,000 but less than \$100,000	4.50%	4.71%	4.00%
\$100,000 but less than \$250,000	3.50%	3.63%	3.25%
\$250,000 but less than \$500,000	2.25%	2.30%	2.00%
\$500,000 but less than \$1,000,000	1.75%	1.78%	1.50%
\$1,000,000 or more	0.00% ⁽³⁾	0.00%	** ⁽²⁾

⁽¹⁾ Offering price includes the front-end sales load. The sales charge you pay may differ slightly from the amount set forth above because of rounding that occurs in the calculation used to determine your sales charge.

⁽²⁾ A selling broker may receive commissions on purchases of Class A shares over \$1 million calculated as follows: 0.75% on purchases between \$1 million and \$3 million, 0.50% on amounts over \$3 million but less than \$5 million, 0.25% on amounts over \$5 million. The commission rate is determined based on the purchase amount combined with the current market value of existing investments in Class A shares.

⁽³⁾ Investors that purchase \$1,000,000 or more of the Fund's Class A shares will not pay any initial sales charge on the purchase. However, purchases of \$1,000,000 or more of Class A shares may be subject to a 1% contingent deferred sales charge ("CDSC") on shares redeemed during the first 12 months after their purchase.

Reducing Your Sales Charge

You may be eligible to purchase Class A shares at a reduced sales charge. To qualify for these reductions, you must notify the Fund's distributor, Northern Lights Distributors, LLC (the "distributor"), in writing and supply your account number at the time of purchase. You may combine your purchase with those of your "immediate family" (your spouse and your children under the age of 21) for purposes of determining eligibility. If applicable, you will need to provide the account numbers of your spouse and your minor children as well as the ages of your minor children.

Letter of Intent. Under a Letter of Intent ("LOI"), you commit to purchase a specified dollar amount of Class A shares of the Fund, with a minimum of \$50,000, during a 13-month period. At your written request, Class A shares purchases made during the previous 90 days may be included. The amount you agree to purchase determines the initial sales charge you pay. If the full-face amount of the LOI is not invested by the end of the 13-month period, your account will be adjusted to the higher initial sales charge level for the amount actually invested. You are not legally bound by the terms of your LOI to purchase the amount of your shares stated in the LOI. The LOI does, however, authorize the Fund to hold in escrow 5% of the total amount you intend to purchase. If you do not complete the total intended purchase at the end of the 13 month period, the Fund's transfer agent will redeem the necessary portion of the escrowed shares to make up the difference between the reduced rate sales charge (based on the amount you intended to purchase) and the sales charge that would normally apply (based on the actual amount you purchased).

Rights of Accumulation. To qualify for the lower sales charge rates that apply to larger purchases of Class A shares, you may combine your new purchases of Class A shares with Class A shares of the Fund that you already own. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the current value of all other Class A shares that you own. The reduced sales charge will apply only to current purchases and must be requested in writing when you buy your shares.

Shares of the Fund held as follows cannot be combined with your current purchase for purposes of reduced sales charges:

- Shares held indirectly through financial intermediaries other than your current purchase broker-dealer (for example, a different broker-dealer, a bank, a separate insurance company account or an investment adviser);
- Shares held through an administrator or trustee/custodian of an Employer Sponsored Retirement Plan (for example, a 401(k) plan) other than employer-sponsored IRAs;
- Shares held directly in the Fund account on which the broker-dealer (financial advisor) of record is different than your current purchase broker-dealer.

Waiving Your Class A Sales Charge

The sales charge on purchases of Class A shares is waived for certain types of investors, including:

- Current and retired directors and officers of the Fund sponsored by the Adviser or any of its subsidiaries, their families (*e.g.*, spouse, children, mother or father) and any purchases referred through the Adviser.
- Employees of the Adviser and their families, or any full-time employee or registered representative of the distributor or of broker-dealers having dealer agreements with the distributor (a “Selling Broker”) and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the fund’s shares and their immediate families.
- Participants in certain “wrap-fee” or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the distributor.
- Clients of financial intermediaries that have entered into arrangements with the distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisers may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker-dealers that charge a transaction fee and that have entered into agreements with the distributor.
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Employer-sponsored retirement or benefit plans with total plan assets in excess of \$5 million where the plan’s investments in the Fund are part of an omnibus account. A minimum initial investment of \$1 million in the Fund is required. The distributor in its sole discretion may waive these minimum dollar requirements.

The Fund does not waive sales charges for the reinvestment of proceeds from the sale of shares of a different fund where those shares were subject to a front-end sales charge (sometimes called an “NAV transfer”).

A CDSC of up to 1.00% of the purchase price will be charged to the shareholders who received a sales charge waiver and then redeem their shares within one year after purchase. This CDSC will be based on the lower of the cost of the shares or their NAV at the time of redemption.

The Fund also reserves the right to enter into agreements that reduce or eliminate sales charges for groups or classes of shareholders, or for Fund shares included in other investment plans such as “wrap accounts.” If you own Fund shares as part of another account or package, such as an IRA or a sweep account, you should read the terms and conditions that apply for that account. Those terms and conditions may supersede the terms and conditions discussed here. Contact your selling agent for further information.

Further information regarding the Fund’s sales charges, breakpoints and waivers is available free of charge upon request.

Share Price

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of each class of shares is calculated as of the close of regular trading (generally 4:00 p.m., Eastern time) on each day that the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on the primary exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board and evaluated by the Board as to the reliability of the fair value method used. In these cases, the Fund's NAV will reflect certain portfolio securities' fair value rather than their market price. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security is materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available.

The Fund may use independent pricing services to assist in calculating the value of the Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in futures interests securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the Fund does not price its shares, the value of some of the Fund's portfolio securities may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund's net asset value is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

How to Purchase Shares

The Fund currently offers two classes of shares so that you can choose the class that best suits your investment needs: Class A and Class I shares. The main differences between the classes are the ongoing fees. In choosing which class of shares to purchase, you should consider which will be most beneficial to you given your investment goals, the amount of your purchase and the length of time you expect to hold the shares. Each class of shares in the Fund represents an interest in the same portfolio of investments in the Fund. Not all share classes may be available for purchase in all states.

Purchase by Mail. To purchase the Fund's shares by mail, simply complete and sign the Account Application and mail it, along with a check made payable to "Longboard Managed Futures Strategy Fund" to:

via Regular mail:

Longboard Managed Futures Strategy Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

via Overnight mail:

Longboard Managed Futures Strategy Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, NE 68130

Purchase through Brokers. You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the fund's behalf.

Purchase by Wire. If you wish to wire money to make an investment in the Fund, please call the Fund at 855-294-7540 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan. You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 855-294-7540 for more information about the Fund's Automatic Investment Plan. Minimum initial investment requirements may be waived for Automatic Investment Plan investors, at the Fund's discretion.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to **"Longboard Managed Futures Strategy Fund."** The Fund will not accept payment in cash, including cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

Anti-Money Laundering Program. The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

In order to ensure compliance with these laws, the Account Application asks for, among other things, the following information for all "customers" seeking to open an "account" (as those terms are defined in rules adopted pursuant to the USA PATRIOT Act):

- full name;
- date of birth (individuals only);
- Social Security or taxpayer identification number; and
- permanent street address (P.O. Box only is not acceptable).

Accounts opened by entities, such as corporations, limited liability companies, partnerships or trusts, will require additional documentation.

Please note that if any information listed above is missing, your Account Application will be returned and your account will not be opened. In compliance with the USA PATRIOT Act and other applicable anti-money laundering laws and regulations, the Transfer Agent will verify the information on your application as part of the Program. The Fund reserves the right to request additional clarifying information and may close your account if such clarifying information is not received by the Fund within a reasonable time of the request or if the Fund cannot form a reasonable belief as to the true identity of a customer. If you require additional assistance when completing your Account Application, please contact the Transfer Agent at 855-294-7540.

How to Redeem Shares

You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

via Regular mail:

Longboard Managed Futures Strategy Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

via Overnight mail:

Longboard Managed Futures Strategy Fund
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, NE 68130

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 855-294-7540. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of your telephone instructions. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$100 on specified days of each month into your established bank account. Please contact the Fund at 855-294-7540 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1%

of the Fund's net assets at the beginning of the 90-day period). The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of a request in "good order." If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank (usually within 10 days of the purchase date).

Good Order: Your redemption request will be processed if it is in "good order." To be in good order, the following conditions must be satisfied:

The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;

The request must identify your account number;

The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and

If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance falls below the minimum investment amount for the class of shares you hold (e.g., \$2,500 for a Class A account, etc.), the Fund may notify you that, unless the account is brought up to the minimum investment amount within 60 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below required minimum due to a decline in NAV.

Tools to Combat Frequent Transactions

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Fund's Board has approved policies that seek to curb these

disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy;" and
- Rejecting or limiting specific purchase requests.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

The Fund reserves the right to reject or restrict purchase or exchange requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase or exchange orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial adviser) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions, and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

Householding. To reduce expenses, the Fund mails only one copy of the Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 855-294-7540 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

Distribution of Fund Shares

The Distributor

Northern Lights Distributors, LLC (the "Distributor") is located at 17605 Wright Street, Omaha, NE 68130, and serves as distributor and principal underwriter to the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Distribution and Shareholder Servicing Plan (12b-1)

The Fund has adopted a Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 (the "12b-1 Plan") under the 1940 Act applicable to the Class A shares. Under the 12b-1 Plan, the Fund is authorized to pay the Fund's distributor, or such other entities as approved by the Board of Trustees, a fee for the promotion and distribution of the Fund and the provision of personal services to shareholders. The maximum amount of the fee authorized is 0.25% of the Fund's average daily net assets annually for the Class A shares. The distributor may pay any or all amounts received under the 12b-1 Plan to other persons, including the Adviser, for any distribution or service activity. Because these fees are paid out of the Fund's assets on an on-going basis, over time these fees will increase the cost of your investment in the Fund and may cost you more than paying other types of sales charges.

In addition to the fees paid under the 12b-1 Plan, the Fund may pay service fees to intermediaries such as banks, broker-dealers, financial advisors or other financial institutions, including the Adviser and affiliates of the Adviser, for sub-administration, sub-transfer agency and other shareholder services associated with shareholders whose shares are held of record in omnibus, other group accounts or accounts traded through registered securities clearing agents.

Additional Compensation to Financial Intermediaries

The distributor, its affiliates and the Adviser, out of its own resources, and without additional cost to the Fund or its shareholders, may provide additional cash payments or non-cash compensation to intermediaries who sell shares of the Fund. Such payments and compensation are in addition to service fees paid by the Fund, if any. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to the Fund's shareholders. The Adviser may also pay cash compensation in the form of finder's fees that vary depending on the dollar amount of the shares sold.

Distributions and Taxes

Tax Status, Dividends and Distributions

Any sale or exchange of a Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gains annually in December. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant from such accounts or plans.

Your redemptions, including exchanges, may result in a capital gain or loss for federal income tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. This summary is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. The tax considerations relevant to a specific shareholder depend upon its specific circumstances, and this summary does not attempt to discuss all potential

tax considerations that could be relevant to a prospective shareholder with respect to the Fund or its investments. This general summary is based on the Internal Revenue Code of 1986, as amended (the "Code"), the Federal Income Tax Regulations promulgated thereunder, and administrative and judicial interpretations thereof as of the date hereof, all of which are subject to change (potentially on a retroactive basis). You should consult your own independent tax advisors to determine the tax consequences of owning the Fund's shares.

Other Reporting and Withholding Requirements. Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax Compliance Act ("FATCA") may be subject to a generally nonrefundable 30% withholding tax on: (a) income and dividends paid by a Fund after June 30, 2014 and (b) certain capital gain distributions and the gross proceeds arising from the sale of Fund shares paid by the Fund after December 31, 2016. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it either enters into a valid agreement with the IRS or otherwise complies with the specific requirements and provisions of an applicable intergovernmental agreement, in each case to, among other requirements, to collect and report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Consolidated Financial Highlights

The consolidated financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the consolidated financial statements audited by McGladrey LLP, whose report, along with the Fund's consolidated financial statements are included in the Fund's May 31, 2015 annual report, which is available at no charge upon request.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Period.

Class A	For the Year Ended May 31, 2015	For the Year Ended May 31, 2014	Period Ended May 31, 2013 (1)
Net asset value, beginning of period	\$ 10.07	\$ 10.00	\$ 10.31
Activity from investment operations:			
Net investment gain (loss) (2)	(0.36)	(0.31)	(0.06)
